<p>Free Map Update: Worried about your map becoming out of date? Concerned about what future cost you will incur? TomTom PRO devices offer 1 free Map update for use within 1 year. This is a \$99.95 (PRO 4000) or \$129.95 (PRO 8000) value.</p>	<p>Toll Free PRO Support Line: PRO Series offers a dedicated Technical Support line connecting you directly to expert support specialists that understand the needs of business customers.</p>	<p>"Help Me!" Emergency Menu: The "Help Me!" menu provides access to local emergency services. Drive to, walk to or call police, fire stations and hospitals. The "Where Am I?" feature pinpoints your exact location to provide to emergency providers. Basic First Aid information also included.</p>
<p>TomTom Map Share™: The PRO series comes with TomTom's unique Map Share technology. If you find changes in the road network – like blocked roads, reversed traffic direction or new street names – you can note them instantly on your device. Not only can you make your own changes, but you can also share them with the entire Map Share community. You can specify your level of trust to accept all reported fixes or only the ones verified by TomTom.</p>	<p>2 Year Warranty: The PRO Series extended warranty gives customers the peace of mind they need to ensure they are buying the right product for their business.</p>	<p>Menu Lock for Safer Driving: Allows you to ensure users are keeping their "eyes on the road" by limiting the functionality of the device while the vehicle is in motion.</p>
<p>IQ Routes™ Technology: TomTom IQ Routes™ calculates the fastest route possible using actual average speeds of travel on your route rather than only posted speed limits. With TomTom IQ Routes™ you'll always drive the smartest, most efficient route. IQ Routes saves you time, fuel and money. Traffic isn't the same during Monday morning rush hour as it is on a lazy Sunday afternoon. Obstacles can slow you down. The route you're looking for changes depending on the day and time, so the shortest route isn't necessarily going to be the fastest. With TomTom IQ Routes™ you'll always drive the fastest route.</p>		<p>Password Protected: By allowing users to set a 4 digit PIN, you can ensure that your data stays safe and only authorized users have access to your TomTom PRO device.</p>
